# San Ace 92 9RA type **DC** Fan

### Features

## **Low Noise and Energy Saving**

Compared to our current model, (1) noise level has been more than halved (2) and power consumption has been reduced by 44%.

Moreover, the models with PWM control, which enables the control of fan speed, provide further optimized noise level and efficiency.

This fan lasts 2 times longer than the current model, (1) and is capable of continuous operation for 60,000 hours (approximately 7 years), improving the maintainability.

#### Rich Lineup

The product lineup is available in a wide variety in 12/24/48 voltage, cooling performance, noise level, and PWM control. This allows users to choose the most suitable one for their applications.

- (1) Current model:  $92 \times 92 \times 25$  mm San Ace 92 9A type DC Fan (model: 9A0912G401).
- (2) A 4 dB(A) decrease in noise level. (3) For models 9RA0912P4G001 and 9RA0912G4001

# PWM Duty - Speed Characteristics Example

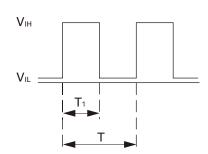

# PWM Input Signal Example

# Input signal waveform

 $V_{IH} = 4.75 \text{ to } 5.25 \text{ V}$   $V_{IL} = 0 \text{ to } 0.4 \text{ V}$ 

PWM duty cycle (%) =  $\frac{T_1}{T} \times 100$  PWM frequency 25 (kHz) =  $\frac{1}{T}$ 

Current source (Isource) = 1.0 mA max. (when control voltage is 0 V) Current sink (Isink) = 1.0 mA max. (when control voltage is 5.25 V)

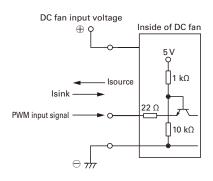

When the PWM control terminal is open,

the fan speed is the same as the speed at 100% PWM duty cycle.

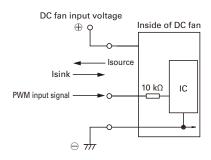

Either a TTL input or open collector/drain input can be used for the PWM input signal.
